

The biggest innovation in residential R/O technology in 30 years! GE Infrastructure Water and Process Technologies has achieved a revolutionary breakthrough in the water treatment industry. Out-of-the-box thinking and years of research have produced a totally new point-of-use drinking water system.

TOUGH STUFF

High-durability Noryl and Polypropylene construction provide years of dependable service.

NEVER RUNS DRY

Endless supply of clean, clear water without the need for a bulky storage tank.

SAFER WATER

No storage tank reduces the potential for bacterial contamination in stagnant water.

SPACE SAVER

Compact design makes it a good fit for tight spaces.

SLEEK, GOOD LOOKS

Contemporary, appliance-style design. Designer faucets available.

ICE IS NICE

Icemaker installations provide crystal-clear ice.

Corrigan Water Solutions uses state-of-the-art water purification processes that produce virtually pure water. The system uses multiple stages of filtration including Reverse Osmosis (RO).

Reverse Osmosis forces the water through a semi-permeable membrane, which separates the dissolved impurities from the pure water and rinses the impurities down the drain. In fact, Reverse Osmosis is the same method by which many bottled water companies purify their water before bottling. It is the most cost-effective method of purification and approaches distillation in purity without the expense of electricity. The RO unit effectively removes the following types of impurities:

1. Particulate matter, turbidity, sediment etc.
2. Colloidal matter
3. Total Dissolved Solids
4. Lead
5. Arsenic
6. Microorganisms
7. Asbestos
8. Pesticides and Herbicides
9. Heavier organic molecules

*The final result is high-quality water that **simply put, tastes great!***

Corrigan is the same company that invented the automatic produce misting system found in most grocery store chains today. Since our introduction of produce misting in 1979, Corrigan Corporation of America has continued to be a leader in the water treatment industry specializing in innovation, manufacturing, and service. Corrigan is a member of the Water Quality Association (WQA) and the GE Platinum Dealer Network. The Merlin Reverse Osmosis System is recognized by the National Sanitation Foundation and is WQA Gold Seal Listed. All of our service technicians are WQA certified.
